

# Optimize Your EHR Experience

The **KLAS Arch Collaborative** is a group of healthcare organizations and vendors committed to improving the EHR experience for clinicians.

KLAS works with each member to transform their EHR experience by uncovering opportunities for change through standardized surveys and benchmarking. KLAS meets with members regularly, and the whole Collaborative meets annually to facilitate learning from other healthcare organizations who are running the same EHR.

**300+**

Participating healthcare organizations

**500,000+**

Surveys administered

**20+**

Vendor partners

**45+**

New healthcare organizations annually

## Healthcare Organizations partner with the Arch Collaborative to:

### Achieve cost savings

Learn how to optimize your EHR system and save on operational costs.

### Reduce burnout

Prioritize your staff's well-being by improving their EHR experience and reducing risk of burnout.

### Decrease staff turnover

Enhance job satisfaction and staff retention by creating a supportive EHR environment.

*"KLAS has reinvigorated my team! **Having the voice of the customers—our clinicians—in a benchmark paradigm is imperative to understanding where we, as an organization, are in the journey to provide a superlative clinical computing experience for our users.** Otherwise we are in danger of making decisions based on anecdotal or squeaky-wheel feedback. We look forward to maturing this concept to influence all that we do for the clinician experience."* —CMIO, large acute care facility

## Healthcare IT companies participate with the Arch Collaborative as well!

Vendors and services firms utilize Arch Collaborative findings to give their solutions the edge they need to excel and dramatically reduce the time it takes to implement changes based on end-user feedback.
